E-Resource Provision

Searching...

Inspiring tomorrow's professionals
Meanwhile…

Google Scholar beta

(launched Nov 2004)
• “To provide ease of searching and access for the user, whilst reducing the workload for Systems and Technical Services, and remaining within current budget levels.”

• “Make recommendations for future provision, e.g. for the next 5 years, taking into account system interoperability and future-proofing.”
“The Vision”

1. First class search engine
   - relevancy ranking, facets, fast results, etc

2. The “one stop shop”
   - reduce silos of data, personalisation, etc

3. Improved systems management
   - interoperability, usage stats, open standards, etc

4. Improved value for money

Inspiring tomorrow’s professionals
Electronic Resources Review

- Small selection of suppliers invited to give 45 minute product demos
- Products rated against “The Vision”
- Report to Library Management Group
  - 3 options for moving forward with pros & cons
“This is the transformational technology which has long been needed to meet student and academic staff expectations in an increasingly complex information environment.”
Project Timescales

- Sep 2009  implementation starts
- Oct 2009  Summon instance delivered
- Feb 2009  360 Link goes live
- Mar 2010  Summon “soft launch”
- Aug 2010  Summon replaces MetaLib
Project Kick-Off

- Conference call with US staff
- MARC21 mapping spreadsheet
  - we went with the defaults
  - need to be able to give each record an ID
    - we add it to 999|a
- Initial customisation of Summon
  - <title> text, branding, etc
6 Week Implementation

- Initial training on populating 360 Core (Serials Solutions Knowledge Base)
- Company aimed to deliver Summon with:
  - Library catalog (via MARC record uploads)
  - University Repository (via OAI-PMH)
  - Journal articles (via 360 Core)
• Initial export of all records from Horizon
• In-house scripts developed to upload records on a daily basis:
  – deletions (via LDR position 5 = “d”)
  – changed records (via Horizon timestamp)
  – new records (via Horizon timestamp)
• Initial issues with deletions
MARC Record FTP Uploads

• Things to consider...
  – when does your LMS actually delete things?
  – do you really want to upload everything from the catalogue?
  • we don’t upload ebooks, ejournals, fast adds, ILL temp records, records where the only items are on order or unavailable, etc

Inspiring tomorrow’s professionals
MARC Record FTP Uploads

• More things to consider...
  – do you want everything to be findable in Summon?
  – we create “dummy” MARC21 records for journal titles and popular e-resources
  – Summon will highlight all of your crappy cataloguing!
    • rogue cataloguers
    • copy cataloguing errors
    • etc, etc, etc!
• Initially, Summon scraped the OPAC
  – potentially a great way to bring your OPAC server to it’s knees!

• Worked with the company to develop a better alternative
  – implemented basic DLF web service
  – code will be released as part of #jisclms project
360 Core Knowledge Base

• You need to populate and maintain the 360 Core KB, regardless of which link resolver you use
  – going with 360 Link makes life easier
    • n.b. Serials Solutions aren’t paying me to say that ;-D

• Default is to use a proxy server
  – this fitted with our plans to use EZproxy more

If the database is non-selectable; values in the status column will be ignored.
To modify the Status: Edit the field next to the Title you wish to modify; using any Status in the list below.
To modify the dates: Add a Custom To and/or Custom From dates in (MM/DD/YYYY or other) valid format.
Valid dates and additional information can be found in Support Center Answer #86.

Please be sure to verify and/or edit the status of tracked titles prior to re-uploading this file.
360 Core Knowledge Base

- We’ve found 360 Core very easy to use
- In just 2 months, we activated twice as many journals as we’d managed to activate in 4 years with SFX
  - being able to tell staff/students they now had access to twice as many journals was good! ;-)

Burney Collection

Introduction

The newspapers and news pamphlets gathered by the Reverend Charles Burney (1757-1817) represent the largest single collection of 17th and 18th century English news media. The 700 or so bound volumes of newspapers and news pamphlets were published mostly in London, however there are also some English provincial, Irish and Scottish papers, and a few examples from the American colonies, Europe and India.

• Links to digitised off-air recordings
  – DCXML format
  – unfortunately, new records haven’t been processed since January 😞
• Closed (customer only) XML API
  – can be used if you want to run the Summon interface locally or you could write your own interface
  – also works with VuFind
  – Virginia using API to provide an accessible/mobile friendly version of the OPAC
  – we’ve used it to help identify problem MARC records
What’s in Summon today?

- 40m+ journal articles (inc. OA)
- 35,000+ journals (both print & electronic)
- All print material held in the Libraries
- University Repository
- Electronic books (inc. ebrary, Books24x7)
- UniTube Off-Air Recordings
